

Cloud-based digital signage CMS

NowSignage is an award-winning digital signage CMS that enables users to upload, schedule & manage content across screens at the click of a button. Operating across all industry sectors, NowSignage is ideal for a single location with a handful of screens, or multiple global locations with thousands of screens.

Class-leading features out-of-the-box

NowSignage multi-zone capabilities allows the seamless playing of static ads, videos, live YouTube, TV channel streaming, RSS news feeds, dashboards, web views, moderated social media posts, secure Microsoft PowerBI dashboards and custom Google integrations. Our advanced proof-of-play, audience measurement and targeted content controls are also provided at no extra charge!

- // Most affordable
- // Secure & reliable
- // Easy to use
- // Hardware agnostic
- // Custom integrations
- // Superior support

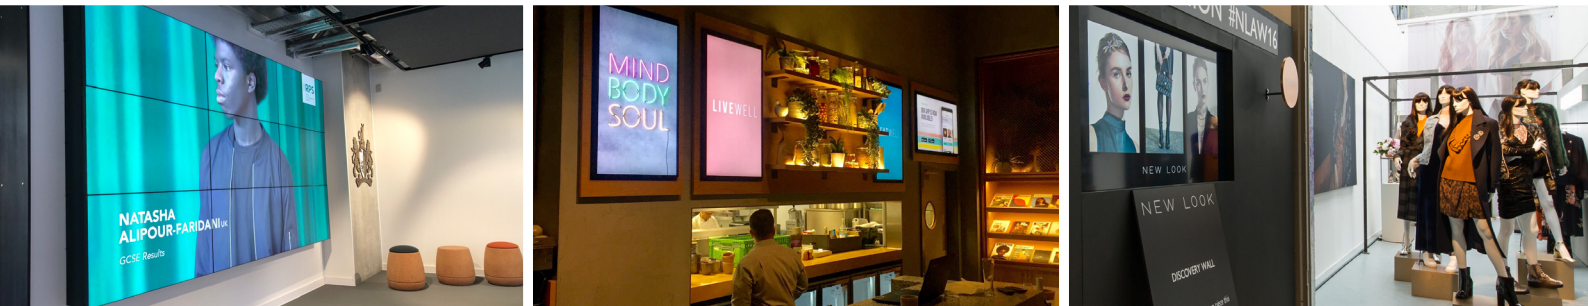

About us:

NowSignage are true SaaS; continually evolving and improving our technology.

With 4,000+ customers implemented across 30+ countries, NowSignage are trusted by the world's biggest brands. NowSignage can be implemented across all industry sectors, across a wide array of applications.

NowSignage only sell via our reseller and distribution channel partners. Our well established partner eco-system and hardware agnostic approach means that NowSignage is fully compatible with all leading System-on-Chip displays and media players.

“The most advanced, secure & cost effective CMS on the market”
